Acknowledgements

We are indebted to all helped us make this book into a reality through their skilled support.

Glenn Bergen, the open access lead with eScholarship through the University of Manitoba Libraries, led us through each step of the open access publishing process, offering invaluable guidance throughout. He and Nicholas Lysecki from the University of Manitoba Libraries led the copy-editing and formatting of the chapters to ensure consistency, among other contributions to publish this book. As well, Mary Osunlusi at the University of Manitoba, Thabo Patrick Mbenenge at the University of Cape Town, and Jess Koroscil of Winnipeg all contributed to this anthology in behind-the-scenes ways.

We thank Bruce Williams, the photographer and conceptual designer for our book cover. Among other gifts shared with us, he generously allowed the dandelions at his home to go to seed in order to photograph the beautiful cover image.

And we extend thanks to Dr. Barbara Gibson, Professor Emerita of Physical Therapy at the University of Toronto, and Dr. Judith Lane, Senior Lecturer at Queen Margaret University, for their helpful peer review of the book's introductory chapter.

Contributing Authors

Kristen Abrahams is a speech-language pathologist and senior lecturer in the Division of Communication Sciences and Disorders in the Department of Health and Rehabilitation Sciences in the Faculty of Health Sciences at the University of Cape Town, South Africa. She is particularly interested in the contribution of decolonial methodologies in addressing equity and supporting social justice and inclusion in speech-language pathology research, education and practice. Website: <https://health.uct.ac.za/departments-dhrs/contacts/kristen-abrahams>. ORCID: <https://orcid.org/0000-0002-6885-0162>.

Seyi Ladele Amosun is a Professor Emeritus and an Academic Mentor to staff and postgraduate students at the Department of Health and Rehabilitation Sciences, University of Cape Town, and Faculty of Dentistry, University of the Western Cape, South Africa. He has research interests in Disability across the life span: Prevention and Wellness and Capacity Development in Allied Health Sciences Education. He holds a BSc in Physiotherapy; PhD in Metabolic and Applied Physiology; PG Diploma in Health Professional Education. ORCID: <https://orcid.org/0000-0001-7385-227X>.

Jeffrey John Andrion, PT, PhD, MA, BSCT. At A.T. Still University (Arizona, USA), he is an Associate Professor at the Department of Physical Therapy, Adjunct Faculty at the School of Osteopathic Medicine in Arizona, and A.T. Still Research Institute Scientist. At the University of Toronto (Canada), he is an Adjunct Lecturer at the Department of Physical Therapy and Chair of the Philippine Working Group - International Centre for Disability and Rehabilitation. ORCID: <https://orcid.org/0009-0007-7612-6135>.

Cathy Bulley is a Professor at Queen Margaret University, Edinburgh. She trained as a physiotherapist at Queen Margaret University between 1994 and 1998 and remained to complete her PhD between 1998 and 2002. She soon moved into academia, using audit, service evaluation, and research to advocate for people living with different long-term health conditions and for the people in their lives. Cathy moves between ways of seeing the world to use the best methods to ask and answer questions that come from different perspectives. More recently she has moved into innovation and social entrepreneurship. Cathy spends time in conversation with others about how physiotherapy can evolve as a profession that embraces humility in growing beyond its current boundaries. Website: <https://www.qmu.ac.uk/schools-and-divisions/dnbsppr/physiotherapy/physio-staff/professor-cathy-bulley>. ORCID: <https://orcid.org/0000-0001-8338-5388>.

Shirley Chubb is Emerita Reader in Interdisciplinary Art at the University of Chichester and an Honorary Fellow in the School of Health Sciences, University of Brighton. Her research focuses on broadening the reach, impact, and collaborative potential of the visual arts and involves the use of artefacts, film, and digital technologies with her early work responding to heritage sites, archives, and museum collections. Her current work is underpinned by her interest in posthuman theory and new materialism and focuses on how visual art might become an effective means to manifest the significance of walking in particular environments and landscapes. Her work is held in public and private collections and has been funded by Arts Council England, the Arts and Humanities Research Board, and the Wellcome Trust. In 2020 Shirley received the Creative Physiotherapy Visiting Scholarship working within the Faculty of Health and Environmental Sciences at Auckland University of Technology and she is Co-Lead of the Posthuman Walking Project. For Shirley's publications, see <https://www.shirleychubb.co.uk/>. ORCID: <https://orcid.org/0000-0001-8795-404X>.

Jane Culpan is a Senior Lecturer in Physiotherapy at Queen Margaret University, Edinburgh. Following clinical practice in New Zealand and the United Kingdom, she began her research career with studies into the benefits of exercise training for people in rehabilitation after acquired brain injury. This led to an academic career in teaching and a focus on curriculum content for allied health professions, including physiotherapists. She is interested in developing critical perspectives of physiotherapy education and now contributes to developing courses in professional practice and communication, sustainability, and health promotion. Website: <https://www.qmu.ac.uk/schools-and-divisions/dnbsppr/physiotherapy/physio-staff/dr-jane-culpan>. ORCID: <https://orcid.org/0009-0003-6692-0811>.

Tehran J. Davis is an Assistant Professor in the Department of Psychology at the University of Cincinnati. He earned his MA in Experimental Psychology in 2009 and PhD in Experimental Psychology in 2012 from the University of Cincinnati. Tehran's research focuses on perceptual and motor processes that are involved in the selection, control, and online coordination of goal-directed action. ORCID: <https://orcid.org/0000-0001-8283-4305>.

Alex Branco Fraga is a Full Professor at the Faculty of Physical Education, Physiotherapy, and Dance (ESEFID) at the Universidade Federal do Rio Grande do Sul (UFRGS) in Brazil. He also holds the position of Associate Professor (Status Only) at the Faculty of Kinesiology and Physical Education at the University of Toronto in Canada. He leads the research group Educational Policies for Physical Education and Health (Polifes) at ESEFID/UFRGS. He is an Advisory Board Member for the Centre for Critical Qualitative Health Research at University of Toronto. His main research interests include educational policies, curriculum development, health and physical education, physical activity, risk and health promotion, qualitative methodology, and scientific journal publishing. He is also the Editor-in-Chief of *Movimento*, a Brazilian open-access journal indexed by Web of Science and Scopus. ORCID: <https://orcid.org/0000-0002-6881-1446>.

Roshan Galvaan is a Professor of Occupational Therapy at the University of Cape Town and currently leads the Department of Health and Rehabilitation Sciences. She aims to make critical contributions through her scholarship, actively pursuing avenues to translate research into practice across professions. She is a National Research Foundation C1-rated scholar and is a prior recipient of the UCT Social Responsiveness Award, recognising her longstanding collaborations through engaged scholarship with multiple community partners. She is an alum fellow of the W.E.B. Du Bois Research Institute at the Hutchins Centre for African and African American Research at Harvard University. As an Inclusive Practices Africa research unit member, she leads the Student Mental Health, Disability inclusive community-oriented primary care and Health and Rehabilitation Decolonising Curriculum project. ORCID: <https://orcid.org/0000-0003-0014-1842>.

Karen Synne Groven is a physiotherapist and professor in public health and rehabilitation at Oslo Metropolitan University and VID Specialized University. Groven's research interests include women's health, long-term pain and illness, rehabilitation, habilitation, physiotherapy, professional practice, and public health. Groven is inspired by perspectives in phenomenology, ethics, and post-critical theories. She has published articles in international journals as well as co-editing international anthologies along with colleagues from Canada, New Zealand, and Australia, including Gibson et al., *Manipulating practices: A critical physiotherapy reader*, Cappelen Damm Akademisk (2018), and Nicholls et al., *Mobilizing knowledge in physiotherapy: Critical reflections on foundations and practices* (2020). Groven also participates in the public debate. Website: <https://www.oslomet.no/en/about/employee/karensy/>. ORCID: <https://orcid.org/0000-0002-5208-0714>.

Liz Harvey is a PhD candidate and a Senior Instructor in the Department of Physical Therapy at the University of Manitoba in Winnipeg, Canada. She is a physiotherapist with experience working in Canada, Australia, and the United Kingdom. Her research interests include professional identity development in physiotherapy students and the use of critical and arts-based qualitative research approaches. ORCID: <https://orcid.org/0000-0003-1961-9818>.

Clair Hebron is a physiotherapist and academic. She is interested in philosophy, sociology and the intersection of art and science. Her research seeks to explore persons' experience of providing and seeking care and develop conceptual understanding and critical insights into practice. She has experience using a range of different methodologies including grounded theory, phenomenology, phenomenography, critical theory and post-qualitative/posthuman approaches. Clair is a member of the Physiotherapy Pain Association and the Association for Narrative Practitioners in Healthcare. She is a founding member of the Critical Physiotherapy Academy and is Co-Lead of the Posthuman Walking Project. For Clair's publications, see her profile on the University of Brighton website: <https://research.brighton.ac.uk/en/persons/clair-hebron>. ORCID: <https://orcid.org/0000-0003-4353-9711>.

Kavi C. Jagadamma began his career as a physiotherapist in India, then moved to Scotland to study for his doctorate. He is currently a senior lecturer and researcher at Queen Margaret University, Edinburgh. He has a keen interest in social entrepreneurship, innovation, and research and is an advocate for co-design in practice and research. His scholarly interests also include the challenges of decolonising the curriculum and in exploring the complexities of creating space for all to feel a sense of belonging in education and practice. Website: <https://www.qmu.ac.uk/schools-and-divisions/dnbsppr/physiotherapy/physio-staff/dr-kavi-jagadamma>. ORCID: <https://orcid.org/0000-0003-2011-0744>.

Harsha Kathard is currently the Research Director of Inclusive Practices Africa Research Unit at the University of Cape Town. Her research and practice have focused on decolonising health professions' education, equitable practices in communication professions, and disability inclusion in education, health, and work. She has an invested interest in transformation of undergraduate and postgraduate teaching across disciplines and is a National Research Foundation (South Africa) rated scientist. She has served in academic and professional leadership positions and offers mentoring. She contributes to national and international curriculum change initiatives. Website: <https://health.uct.ac.za/ipa>. ORCID: <https://orcid.org/0000-0002-0442-9889>.

Daniela Meirelles Lagranha is a physiotherapist who graduated from Methodist University Center (IPA) and holds a PhD and Master's degree in the Science of Human Movement from the Federal University of Rio Grande do Sul (ESEFID/UFRGS). Faculty of Health Sciences of São Paulo certified her in acupuncture (FACIS-IBEHE) and the Federal University of Rio Grande do Sul trained her in Pilates. Affiliated with Educational Policies for Physical Education and Health (Polifes), her main research interests are planetary health, health promotion, qualitative methodology, curriculum, higher education, institutional evaluation, physiotherapy, the Pilates method, and theories that connect the body, culture, and health. ORCID: <https://orcid.org/0000-0003-4316-9044>.

Judith Lane is a Senior Lecturer in Physiotherapy at Queen Margaret University, Edinburgh. She teaches both undergraduate and postgraduate programmes within the School of Health Sciences, with a particular focus on allied health professional development and research skills. Her scholarly interests include decolonising the curriculum and compassionate pedagogies. Judith's research focuses on orthopaedics and sports rehabilitation. Her recent publications feature a book chapter on decolonising physiotherapy education and research articles on falls prevention and rehabilitation strategies for runners. Website: <https://www.qmu.ac.uk/schools-and-divisions/dnbsppr/physiotherapy/physio-staff/dr-judith-lane>. ORCID: <https://orcid.org/0000-0003-0413-8421>.

Zoe A. Leyland (she/they), PhD, is a health sciences scholar, coordinator, and guest lecturer in the Faculty of Health Sciences at Western University (London, Ontario, Canada/Turtle Island) (<https://www.uwo.ca/fhs/>) with an emphasis in equity, diversity, inclusion, accessibility, and decolonization (EDIDA) as well as interprofessional education. Zoe consults and provides guidance to faculty, staff, and students on inclusive curriculum, practices, and pedagogy. Additional research experience and interests include pain management, weight stigma, professional identity, 2SLGBTQIA+ community building, reflective practices, and knowledge mobilization. They are dedicated to creating inclusive spaces in academia, decolonization as a settler, social justice, and storytelling as a person with lived experience with complex chronic pain. A full list of her publications

may be found at <https://www.researchgate.net/profile/Zoe-Leyland>.
ORCID: <https://orcid.org/0000-0002-0227-6735>.

Matthew Low is a Consultant Physiotherapist at University Hospitals Dorset NHS Foundation Trust in the south of England. He is an executive member of the Musculoskeletal Association of Chartered Physiotherapists (MACP) and holds Visiting Fellow positions at both the Orthopaedic Research Institute, Bournemouth University, and Health Sciences University. In 2024, Matthew received the Chief Allied Health Professions Officer's Gold Award for Excellence from NHS England, recognising his significant contributions to physiotherapy. He is currently undertaking a PhD at the University of Nottingham, researching posthuman futures in physiotherapy. With professional interests spanning clinical reasoning, philosophy, environmental and ecological thinking, Matthew's work integrates academic research and clinical practice aiming to advance concepts of health and encourage interdisciplinary collaboration. ORCID: <https://orcid.org/0000-0003-3261-3293>.

Filip Maric, PhD, is Associate Professor at UiT The Arctic University of Norway located in Tromsø, where he teaches planetary, public and occupational health, research skills, and a variety of other subjects to physiotherapy and occupational therapy students. Filip is also Adjunct Association Professor at the University of Oslo, where he teaches sustainability education for university educators across all disciplines. He is the founder and Executive Chair of the Environmental Physiotherapy Association (<https://environmentalphysio.com/>) and member of the UiT sustainability think tank tasked to advance the implementation of the sustainability strategy for the northernmost university in the world. Filip's interests and research span widely across planetary health and sustainability studies, with a particular view to their critical and philosophical advancement. A full list of his publications is available at https://en.uit.no/ansatte/person?p_document_id=706687. ORCID: <https://orcid.org/0000-0002-1265-6205>.

Riley Mayr earned his PhD in Experimental Psychology from the University of Cincinnati in 2022 and MA in Experimental Psychology in 2019. Riley currently studies human factors with an

emphasis on augmented and virtual reality as an applied AR/VR scientist at Kinetic Vision (Cincinnati, USA). ORCID: <https://orcid.org/0000-0002-7179-4499>.

Jan Messel is a historian and research professor at Centre for the Study of Professions (SPS) at Oslo Metropolitan University. He is a supervisor for PhD students and is the head of the research group Professional Practice. Messel's research fields are especially the history of higher education and the history of professions, and he has published several books and articles in this fields. Website: <https://www.oslomet.no/en/about/employee/janmes/>. ORCID: <https://orcid.org/0009-0005-5424-7409>.

Tone Dahl-Michelsen is a physiotherapist and professor in health and rehabilitation at Oslo Metropolitan University and VID Specialized University. She teaches and supervises at different master programs and at ph.d. programs in health sciences. Dahl-Michelsen's research interests are in professional practices/knowledge practices, rehabilitation and women's health/gender studies. She is head of the research group GENDERHEALTH. Dahl-Michelsen has published several articles in international journals and participated in different book projects related to physiotherapy, ethics, and gender. Website: <https://www.oslomet.no/en/about/employee/tonedami/>. ORCID: <https://orcid.org/0000-0002-2923-5036>.

Dave Nicholls is a Professor of Critical Physiotherapy in the School of Clinical Sciences at AUT University in Auckland, New Zealand. He is a physiotherapist, lecturer, researcher and writer, with a passion for critical thinking in and around the physical therapies. Dave was the founder of the Critical Physiotherapy Network (CPN), the International Physiotherapy History Association (IPHA) Executive, and founding Executive member of the Environmental Physiotherapy Association (EPA). He is the author of *The End of Physiotherapy* (Routledge, 2017) and *Physiotherapy Otherwise* (Tuwhera, 2022) as well as a number of edited books and numerous journal articles. He has taught in physiotherapy programmes in the UK and New Zealand for over 30 years and has presented his work around the world. Website: <https://paradoxa.substack.com>. ORCID: <https://orcid.org/0000-0001-9925-9810>.

Mahitsonge Nomusa Ntinga is a Lecturer at the University of Cape Town (UCT), South Africa, where she teaches development across the lifespan in the field of paediatrics, electrophysical agents, African identity in Indigenous Knowledge Systems towards planetary health, and provides supervision in research projects to physiotherapy undergraduate and postgraduate students. She is a critical decolonial womanist within the Faculty of Health Sciences in the Department of Health and Rehabilitation Sciences in the division of Physiotherapy. She is a PhD scholar focusing on the professional identity formation of the othered South African physiotherapists within the school of Health Sciences education. A full list of her publications is available at <https://health.uct.ac.za/departments-dhrs/contacts/ms-nomusa-ntinga-ms-nomusa-ntinga>. ORCID: <https://orcid.org/0000-0002-9725-9312>.

Anna Ilona Rajala is a critical theorist and social scientist. With a background in physiotherapy, she defended her PhD thesis at the University of Brighton (UK) in 2021 on physiotherapy ethics and the relationship between theory and practice in Theodor W. Adorno's thinking. Her postdoctoral research at the University of the Arts Helsinki focused on aesthetic experience in Adorno's philosophy and narrative medicine. Her current three-year Research Council of Finland postdoctoral fellowship (decision no. 350247) at Tampere University focuses on the politics and bioethics of excrement and abjection. ORCID: <https://orcid.org/0000-0002-9349-1958>.

Michael A. Riley is a Professor in the Department of Rehabilitation, Exercise, and Nutrition Sciences at the University of Cincinnati and Director of the Advanced Human Performance and Neuromechanics Lab at the University of Cincinnati (USA). Michael earned his PhD in Experimental Psychology from the University of Connecticut in 1999. He studies human perceptual-motor behavior from the perspectives of complexity science and ecological psychology with a focus on applications to rehabilitation and human performance. ORCID: <https://orcid.org/0000-0002-3632-204X>.

Sarah M. Schwab-Farrell is a physiotherapist and an Assistant Professor in the Department of Rehabilitation, Exercise, and Nutrition Sciences at the University of Cincinnati (USA). She earned her DPT (2018), MA in Experimental Psychology (2020), and PhD in Experimental Psychology (2022) from the University of Cincinnati. Sarah's current research examines the impact of contextual factors (environmental and personal factors) on the motor control of individuals with disabilities using the theoretical frameworks of ecological-dynamics and critical physiotherapy. ORCID: <https://orcid.org/0000-0002-3835-5718>.

Paula L. Silva is a physiotherapist and Professor in the Department of Psychology at the University of Cincinnati (USA). Paula earned her physiotherapy degree from Universidade Federal de Minas Gerais – UFMG (Brazil) in 2000, MS in Rehabilitation Science from UFMG in 2002, and PhD in Experimental Psychology from the University of Connecticut in 2009. Her research focuses on the action strategies that individuals of different ages, with and without pathological conditions, employ when performing a variety of tasks as well as the perceptual capabilities that support adaptability of action strategies to particular circumstances. ORCID: <https://orcid.org/0000-0002-3749-5575>.

Tobba Sudmann is a full professor of public health, physiotherapist, and medical sociologist at the Department of Health and Function, Western Norway University of Applied Sciences. She has an adjunct practice where she offers equine-facilitated physiotherapy. Her research focuses on how people use their bodily resources to enhance their well-being and social participation, whether the means are in- or outdoor physical activity, technology, nature, or horses. Publications include guest editor and contributor to three special issues on respectively community work and inclusion of horses in mental health care, articles and book chapters on community work, technology and aged care, e-health, priority settings, equine-facilitated physiotherapy, substance use challenges, anti-oppressive practice and micro-aggression. ORCID: <http://orcid.org/0000-0002-7482-9984>.

Patricia Thille is a feminist medical sociologist with a background in physical therapy and Women's Studies. She is an Associate Professor of Physical Therapy at the University of Manitoba and an executive committee member of Critical Physiotherapy Network. Her scholarship bridges critical social scientific theories and qualitative methodologies to the study of issues in health services and health professions education, with an emphasis on disrupting discriminatory logics and practices in primary care and physiotherapy settings. She is the lead editor of the critical physiotherapy anthology *Inviting movements in physiotherapy* and principal investigator leading the Storying Physiotherapy project. Her contributions have most recently been recognized with a Falconer Emerging Research Rh Award (Social Sciences). ORCID: <https://orcid.org/0000-0003-1961-9818>.

Timo Uotinen is a researcher in literature and philosophy with a PhD from Royal Holloway (University of London). He is interested in Shakespeare and Shakespearean influences in different cultures. His philosophical interests include critical theory, German Idealism, and the philosophy of Francis Bacon. These interests merge through a focus on ideology, embodiment, the concept of nature and their intertwinement with ethics. ORCID: <https://orcid.org/0000-0002-3579-7473>.

Adriane Vieira is an Associate Professor at the Faculty of Physical Education, Physiotherapy, and Dance (ESEFID) at the Federal University of Rio Grande do Sul (UFRGS), Brazil. She teaches in the undergraduate Physiotherapy program and the postgraduate Human Movement Sciences program. She co-leads the research group Educational Policies for Physical Education and Health (Polifes) at ESEFID/UFRGS. She has also been a member of the Critical Physiotherapy Network since 2015 and joined the Environmental Physiotherapy Association in 2024. Her research focuses on primary health care, somatic education, planetary health, chronic pain, and body theories. ORCID: <https://orcid.org/0000-0003-3846-0873>.
